Hi Andy,

We met last year when I was working with Mark and James on some bird tissues in RTP – I'm a PhD student of Rainer Lohmann's, and an ORISE at Narragansett ACESD. I'm reaching out to see if you would be willing to act as an internal reviewer for a current MS of mine going through STICS review. My ACESD mentor Mark Cantwell and I are navigating the STICS process to submit an MS related to the bird work I did with Mark and James. Would you be willing to act as a reviewer for this STICS process?

I've attached all MS materials for your consideration, including the article draft, supporting information and tables. The documents are attached as pdfs for ease of reading and as Word docs if you'd like to add any comments/edits directly. The Manuscript Review form is also attached above. This is my first time through with the STICS process, so please let me know if you need any more information from me to consider this request or carry out the review.

Please let me know if you would be able to undertake this review, and thanks very much for your consideration.

Sincerely,
Anna Robuck
